

KITCHEN **SINK** CATALOG

A kitchen sink is a bowl-shaped plumbing fixture that people commonly utilize for dish-washing, washing hands, etc. They have taps (faucets) that provide hot and cold water and come with a spray feature for quick rinsing.

KITCHEN SINKS

Sinks form an integral part of every kitchen and HIRAN make sure that you get the best of choices available. HIRAN Kitchen sinks are manufactured in AISI 304 Grade or Premium Stainless Steel, which are the finest qualities of stainless-steel present. To meet the changing lifestyle requirements, our 100% made-in-India kitchen sinks include cutting-edge craftsmanship and practical features. They're high-quality, elegant-looking, efficient, long lasting and most importantly hygienic . HIRAN offers a wide range of options within its kitchen sink product line. We have Single Bowls, Double Bowls, Sink with Drainboards and all sorts of variations available in multiple sizes to perfectly fit your needs. HIRAN provides you with options for a kind of finish you need on the kitchen sinks based on your decor- we provide both brushed matte for a rustic look and a shiny or glassy finish for a sharp look. For a contemporary aesthetic with an urban edge, the HIRAN handcrafted kitchen sink provides a geometrical design with slightly rounded edges to allow ease of maintenance . All the Sinks also come with a waste coupling and waste pipe to help you with hassle-free installation. Apart from this, the kitchen sinks are equipped with weightless foam sound dampening pads that absorb the noises from the utensils and the running water make it thoroughly soundproof. We acknowledge that a sink plays a significant role in boosting the kitchen's style statement; it not only serves as a basic essential for washing and cleansing, but it also contributes to the modern kitchen's practicality and aesthetics.

INDEX

Bureau of Indian Standards has awarded Hiran Kitchen Sinks with ISI Mark, for adhering to their strict Quality Standards .

Hiran Kitchen Sinks are manufactured in 1mm thick ISI-marked Stainless Steel.

Select Hiran Kitchen Sinks are made from ISI marked, 304 Grade Stainless Steel.

We give lifetime warranty with all Hiran Kitchen Sinks , to give our customers and everlasting peace of mind.

Hiran Kitchen Sinks are guaranteed Rust Proof, as a result of our best selection of raw material for our sinks.

Magnet Test is a credible test to distinguish Hiran Kitchen Sinks from their competitors in the market . Hiran Sinks are guaranteed 100% non-magnetic.

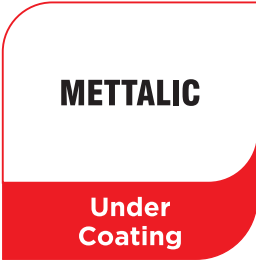

Hiran Kitchen Sinks common with options for Matte and Gloss Finish.
The matte finish gives your kitchen as rustic yet contemporary look and blends in with any decor setting. The mirror-like gloss finish sheds water rapidly, resists spotting and adds a pristine sparkle to your kitchen.

Our hydraulically drawn kitchen sinks undergo a process of annealing where every sink is first drawn partially and then heated in a furnace before being drawn fully, this process make the sink more durable and resilient to rust and cracks.
Our Handmade Kitchen Sinks are skillfully handcrafted prioritizing quality, volume, and aesthetics.

Unlike our competitors in the market, we at HIRAN do not increase the weight of the sink by sticking heavy pads underneath it, we use 4mm thick weightless foam pads to improve the sound dampening effect.

Hiran Kitchen Sinks are fitted with a special sound-deadening undercoating that mitigates the noise from the water hitting the sink’s surface and or from the utensils. We also offer metallic undercoating for an additional charge.

SQUARE SINGLE BOWL

HIRAN[®]
Bath Accessories

DESCRIPTION :

Hiran Square Single Bowl Kitchen Sinks built with 1mm thick 304-Grade Stainless Steel come with Sound-deadening Pads, Installation Accessories (Waste pipe & coupling), and 10 Years of Warranty.

MATERIAL & FINISH :

- Kitchen Sinks are manufactured in 1mm Thick AISI-304 Grade Stainless Steel- 18% Chromium and 8% Nickel composition that actively resists rusting for a longer time.
- Mirror-like Glossy Finish that adds sparkle to your kitchen.

FUNCTIONALITY :

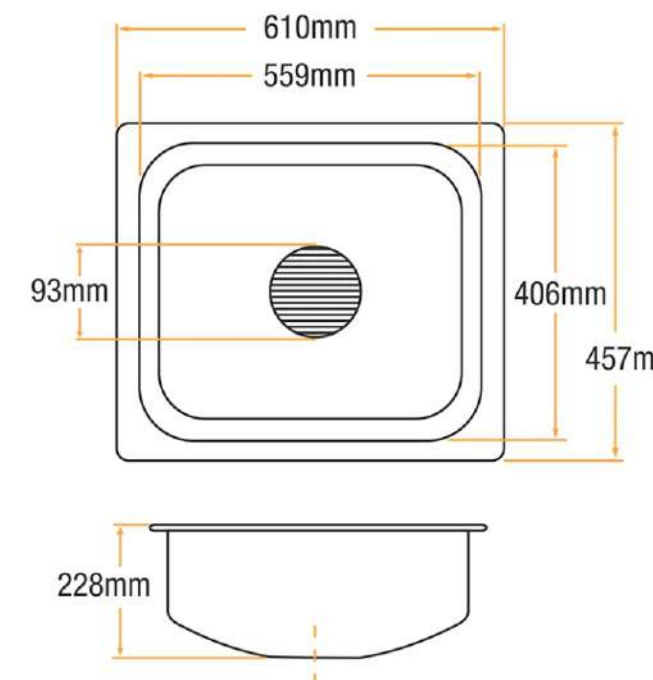

- Square shape gives the sink bowl more space than the conventional oval bowls.
- Sink has a sloped surface that allows quick drainage of water.
- Heavy-duty Stainless Steel Sink Coupling prevents waste from clogging the drainage pipes.
- Robust Non-breakable PVC Waste Pipe is exclusively designed for fast uninterrupted flow with endurance to the extreme temperatures of water.

PRECAUTIONS :

You must remember to avoid using some products and items they may damage both the appearance and durability of your sink.

Chlorides

They can be found in almost all soaps and cleaning products and using them may damage the Sink. They are soluble in water, if used, they must be rinsed well to ensure no trace remains. One good weekly clean is all you need to keep your sink bright & Shiny.

Scratches

As with most metallic surface, a stainless steel think can become scratched. In general, you don't need to worry as with the passing of time wear marks end up blending in with the sink's overall finish.

Knife Use

Using the sink as a cutting board may cause deep scratches in the surface, damaging your sink irreversibly.

Water Quality

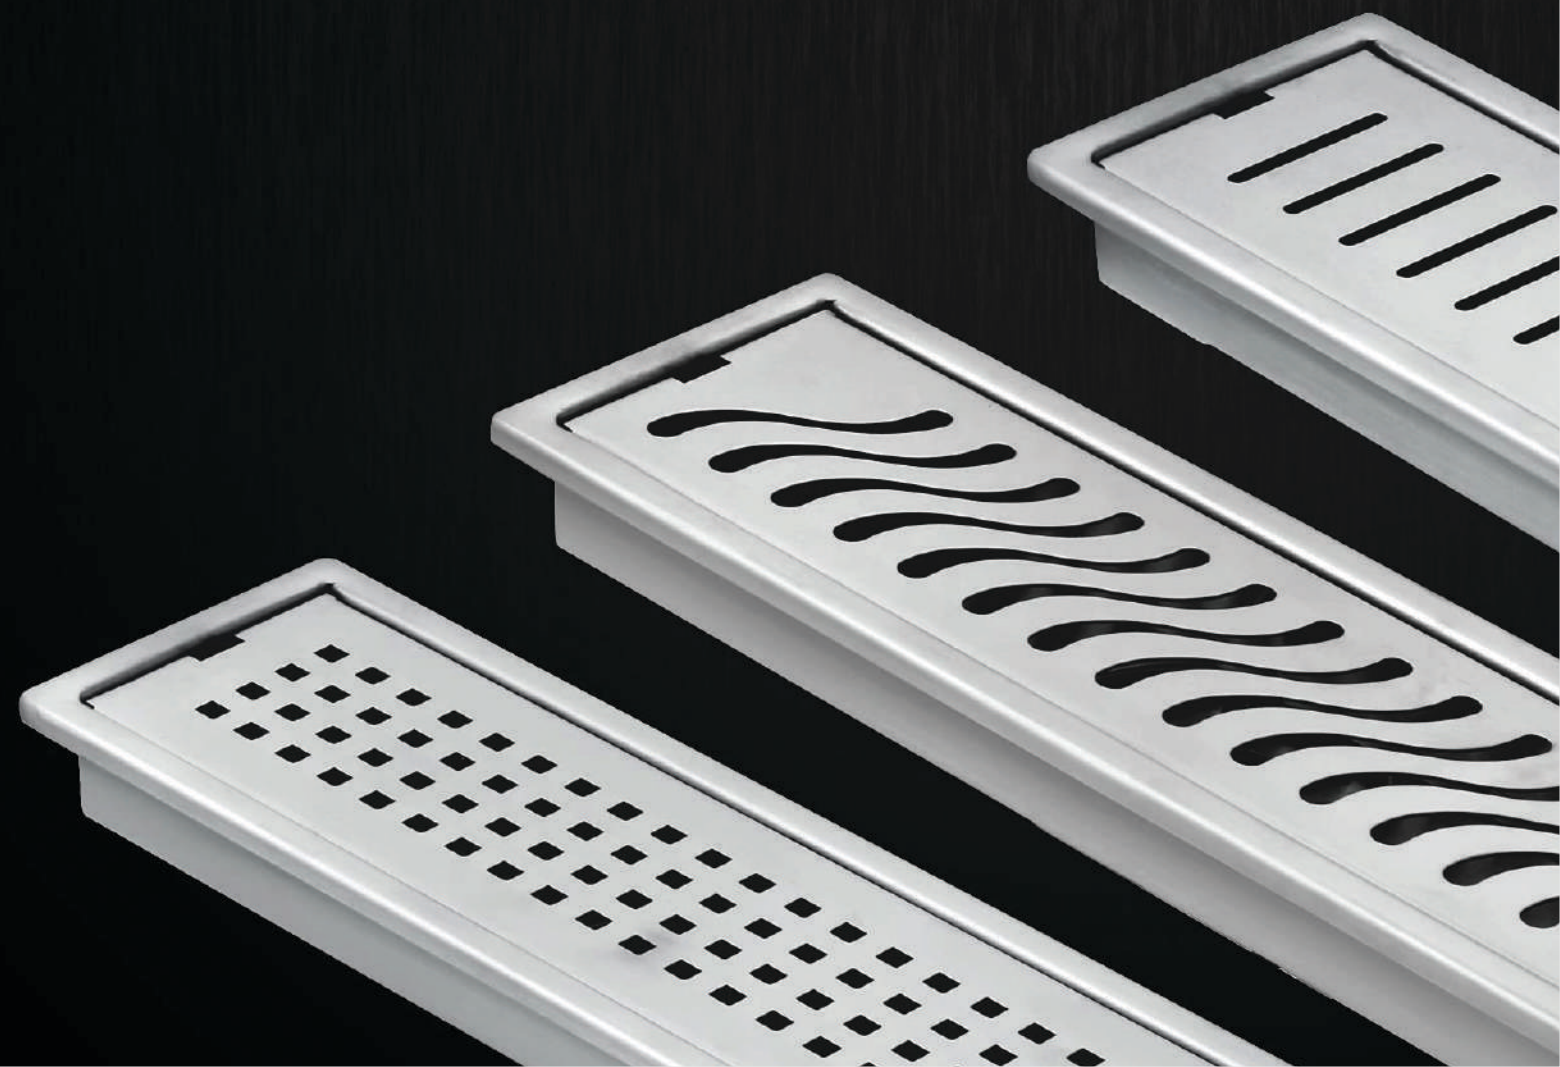

Not all water is the same and some may affect your sink appearance. Sink used in combination with a Reverse Osmosis Filtration System, might be damaged. For example, water with a high iron content may cause rust stains to appear on your sink, Moreover areas with high mineral concentrations may produce white stains. In order to prevent these stains from appearing what ever their cause, we recommended that your sink and dry it and use a soap product specially recommended for sinks once a week.

Food

It is not advisable to dry food that contains high salt level on your sink surface, if it occurs, rinse it carefully after use.

SHOWER **DRAIN** CHANNEL

FLOOR DRAINS

Hiran leads the market with its most-selling floor drains that have a sleek and minimalistic appearance to complement your lifestyle! Manufactured in AISI 304 grade stainless steel and Premium Stainless steel, these floor drains indisputably display anti-corrosion and rust-resitant qualities making them long-lasting. To meet the needs of modern lifestyles, our 100% made-in-india floor drains are designed with cutting-edge craftsmanship and practical features. HIRAN offers a variety of sizes, styles and variations according to the consumers, requirements. Equipped with voluminous drainage technology for extremely high drainage capacity, we offer a wide range of options in floor drains with inventive add-ons like Drain Jali's with rotating locks and hinges to avoid misplacing the drain covers, lids and cockroach traps to prevent pests and foul gasses/smell to enter the bathroom, plain classic Jail's to prevent waste from clogging the drain pipes, holes in drain Jali's to enable easy attachment of waste pipes and so on. These highly function products of HIRAN are the best floor drains available in the market. Apart from their highly-efficient features, Hiran's floor drain bring modern design and technology, such as Jali's and frames with curved or flat cut edges, together to create a feel or convenience in your bathrooms. These floor drains are suitable for bathrooms, kitchens, laundry rooms, basement, washing areas etc. and are easy to install and maintain. We acknowledge that floor drains play a significant role in enhancing the overall look of the bathroom; they are not only efficient in their functionality but also contribute to the modern bathroom/ kitchen's practicality and aesthetics.

SHOWER DRAIN CHANNEL

WAVE

DESCRIPTION :

Hiran Wave Shower Drain Channels made with 1mm Thick 304-Grade Stainless Steel are meant to handle large volumes of water and come with a Side Hole (customizable), Drain Cover, Tray, Cockroach Trap and a 10 Year Warranty.

MATERIAL & FINISH :

- Shower drain channels are manufactured in high-quality 1mm Thick AISI 304-Grade Stainless Steel with 18% Chromium and 8% Nickle content that actively resists rusting for a long time.
- Brushed Matte Finish gives a textured, rustic and edgy look.

APPLICATION AREA :

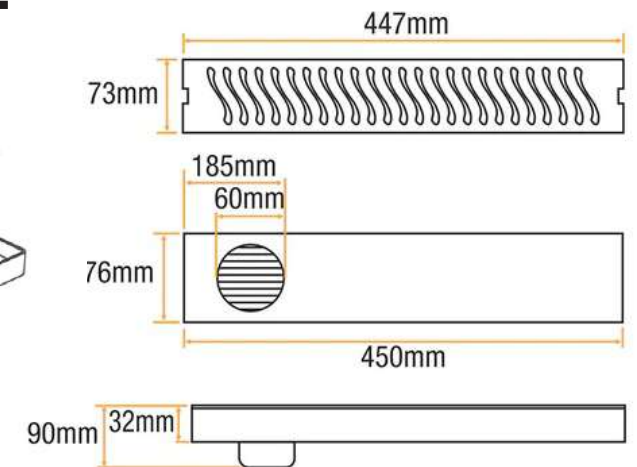

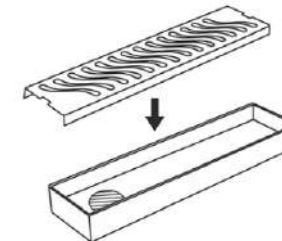

- Linear Drain Channels are suitable for installation in rain showers, commercial kitchens & swimming pool areas.
- Suitable for 3 Inches and above diameter drain pipes.

DIMENSIONS

SHOWER DRAIN CHANNEL WAVE | 18x3 inches

- Raw Material
Stainless Steel 304
- Sheet Thickness
1 MM
- Surface Treatment
Matt Finish

- Drain Cover
- Inner Trap
- Drain Body

Made in
India

CARE & MAINTENANCE :

EVERYDAY CARE :

- Only use a mild soap and a soft cloth for cleaning.
- Do Not use any abrasive cleaners or scrub pads.
- Do Not allow household cleaning agents, such as bleach sit on your drain cover for a long period of time.
- In cases where a stainless steel cleaner is necessary, rinse the drains with plenty of water after use.

SHOWER DRAIN CHANNEL WAVE

FUNCTIONALITY :

- Cockroach Trap helps to prevent odour and blockages in sewage pipes.
- Cockroach Jali barricades the entrance of pests from the drain.
- Drain Cover acts as the first line of defense to prevent waste from clogging the pipes.
- The tray enables quick drainage and does not have a collar to give a continuous look on the floor.

MAINTENANCE :

- Do not use any harsh chemicals like strong detergents/Acids.
- We assure you that the product is 100% made of 304-Grade Stainless Steel, but it is not entirely rust-proof and requires regular maintenance.
- The 8% Nickle helps in resisting rusting for a longer time.

COCKROACH TRAP SQUARE

COCKROACH TRAP :

Anti-Cockroach Trap Jali prevents foul smells, gases, and pests from entering the bathroom, while also collecting waste to avoid clogging the main drain pipe.

DESIGNER GRATING TOP :

Floor Trap has a modernised, grating top/ drain cover that is easy to maintain and clean and ensures faster drainage

INBUILT HOLE :

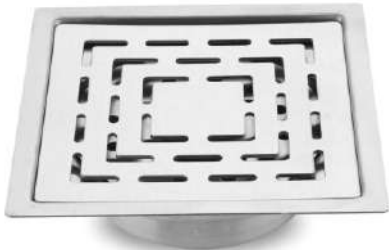

Floor Drain comes with an inbuilt hole allowing flawless attachment of waste pipes from wash basins, washing machines, kitchen sinks and other appliances

MAINTENANCE :

Avoid harsh chemicals like strong detergents and acids; the product, made of 304-grade stainless steel with 8% nickel, is not entirely rust-proof and requires regular maintenance for extended rust resistance.
